***Allowance of Application # 10/766,177***

1. The following communication is in response to applicant's amendment received 22-December-2006, and the IDS received on 26-December-2006. Claims 1-31 are pending in the application.

***Reasons for Allowance***

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter.

2.1 The instant application is directed to a non-obvious improvement over the invention described in USP 5,984,511, issued to Vasey-Glandon et al., which discloses a knowledge driven composite design optimization process for designing composites which establishes a global, manufacturable laminate definition at the ply level, and automates the composite design optimization process and output of three-dimensional laminated composite designs which parametrically link laminates, plies and analysis routines.

2.2 The improvement of the present invention comprises, in various embodiments, a method of reducing internal ply edges in a composite laminate having two or more zones, wherein the zones have various numbers of plies having different properties. This is accomplished by generating a master zone that notionally includes, for plies having each different property, the maximum number of plies having a respective property required in any one zone; sequencing the master zone plies in accordance with predefined stacking design rules; arranging the plies of each zone based upon the stacking sequence in the master zone; and providing instructions configured to direct manufacture of the composite laminate based upon the ply arrangement in

each zone. This patentable distinction is included in each of the independent claims, nos. 1, 11, 17 and 25.

**2.3** The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <method of reducing internal ply edges in a composite laminate having two or more zones> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 4, line 20 through page 20, line 16, and Figures 1-11. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.

**Response Guidelines**

**3.** Any comments considered necessary by applicant **MUST** be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance".

**3.1 Any response to the Examiner in regard to this allowance should be**
